COMPANY UPDATE

17 February 2025 Sweden Healthcare

Guard Therapeutics

Fair value range: SEK37.0–56.0

Guard Therapeutics plans to launch a SEK I 50m rights issue, contingent on a positive interim safety review from its ongoing Phase IIb POINTER trial, expected in early March 2025. The company will hold an EGM around the same time, where the board will seek approval to proceed with the rights issue.

Rights issue of SEK I50m to fund RMC-035 development

Commitments from board members, management, and other shareholders amount to SEK66.5m, covering 44.3% of the issue volume. In addition, external investors have provided SEK53.6m in guaranteed commitments, bringing the total secured amount to 80% of the issue. The final terms, including the subscription price and exact timeline, will be determined by the board provided that there is a positive outcome from the safety review.

The capital raised will primarily be used to complete the Phase IIb POINTER study with RMC-035 in patients undergoing open cardiac surgery, and fund preparations for a potential Phase III trial, assuming positive results. A portion of the funds will also support regulatory interactions, including end-of-Phase II meetings with regulatory authorities, as well as business development efforts aimed at securing strategic partnerships. We estimate that current cash including a fully subscribed rights issue will be sufficient to fund operations until at least mid-2026.

Upcoming events

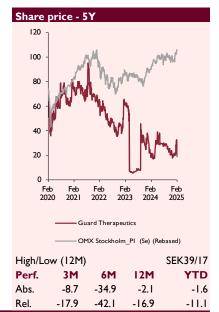

• Q4 Report: 20 Feb 2025

Following this news, we assume a fully subscribed rights issue. This implies that the company will generate net proceeds of SEK135m, factoring in estimated fees of SEK15m (10% of the issue size). As a result, the total number of shares will increase to 22.1m. If the issue is not fully subscribed, we will update our model accordingly. Our new fair value range amounts to SEK37–56 (42–69) per share.

Net IB debt/EBITDA

Equity story

Near term: 6-12m

We expect Guard Therapeutics to report top-line results from its Phase IIb POINTER study in late 2025/early 2026. The study focuses on RMC-035, the company's lead candidate, in patients undergoing open-heart surgery. We expect this milestone to serve as a significant catalyst for the share price.

Long term: 5Y+

The long-term investment case for Guard Therapeutics centres on RMC-035 demonstrating encouraging clinical data and eventually achieving market approval. There are currently no approved treatments for acute kidney injury, and we believe this represents a significant opportunity.

Key risks:

- Clinical development risk
- Regulatory risk
- Funding risk

Company description

Guard Therapeutics is a Swedish clinical-stage biotechnology company engaged in the research and development of new pharmaceuticals targeting areas with significant medical needs. The company focuses on the field of kidney diseases.

Key industry drivers

Ageing population

- Increasing prevalence of kidney diseases
- Advancements in biomarkers and diagnostics

Industry outlook

· We expect the market for kidney diseases to significantly grow over the coming years, primarily driven by rising patient needs and advancements in science, with new novel therapies getting approved.

Valuation and methodology

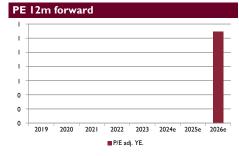

We use a DCF-based sum-of-the-parts approach in our valuation of Guard Therapeutics.

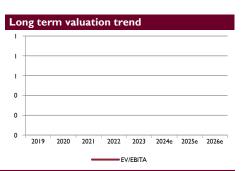

Fair value range 12m

The lower end of our fair value range is based on our DCF-based SOTP model using a WACC of 20%. The upper end of our fair value range is based on our DCF-based SOTP model using a WACC of 14%.

Source: Carnegie Research & company data

Valuation

We use a sum-of-the-parts approach in our valuation of Guard Therapeutics. In our model, we project peak sales of USD635m for RMC-035 in CS-AKI and USD205m in KTX-AKI. Due to the absence of completed clinical trials, we have excluded other potential AKI indications from our valuation.

Our assumptions include a partnership deal for RMC-035 in 2026 with a total value of USD600m, comprising an upfront payment of USD35m, contingent on positive top-line results from the Phase IIb POINTER trial. Additionally, we estimate Guard Therapeutics will receive 14% of net sales for RMC-035.

We assume a fully-subscribed rights issue of SEK150m in 2025. We estimate that the company will generate net proceeds of SEK135m, factoring in estimated fees of SEK15m (10% of the issue size). As a result, the total number of shares will increase to 22.1m. In the case that the issue is not fully subscribed, we will update our model accordingly.

We reach a fair value range of SEK37–56 per share (42–69). The lower end of our fair value range is based on our DCF model using a WACC of 20%, and the upper end is based on our DCF model using a WACC of 14%.

Risks

Clinical development risk: Clinical trials for RMC-035 may fail to demonstrate safety and efficacy, leading to delays or termination of development.

Regulatory risk: Regulatory approval processes are complex and stringent, with no guarantee of approval even after successful trials.

Financial risks: Biotechnology companies often rely heavily on external funding. Guard Therapeutics may need to raise additional capital, diluting shareholder value. As a development-stage company, Guard Therapeutics may not generate consistent revenue streams until RMC-035 reaches commercial stage.

Disclosures and disclaimers

Carnegie Investment Bank AB

Carnegie Investment Bank AB (publ.) is a leading investment bank with a Nordic focus. The Carnegie group of companies, together "Carnegie", generates added value for institutions, companies and private clients in the areas of trade in securities, investment banking and private banking. Carnegie has approximately 600 employees, located in offices in six countries

Valuation, methodology, and assumptions

Commissioned research reports include the analyst's assessment of a fair value range over the coming six to 12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E ratio and EV/EBIT multiples, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing

Frequency of update

Carnegie's research analysis consists of case-based analyses, which implies that the frequency of the analytical report may vary over time. Unless otherwise expressly stated in the report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

Analyst certification

The research analyst or analysts responsible for the content of this commissioned research report certify that, notwithstanding the existence of any potential conflicts of interests referred to herein, the views expressed in this commissioned research report accurately reflect the research analyst's personal views about the companies and securities covered. It is further certified that the research analyst has not been, nor is or will be, receiving direct or indirect compensation related to the specific ratings or views contained in this commissioned research report.

Potential conflicts of interest

Carnegie, or its subsidiaries, may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this report. Any such publicly announced business activity, during the past 12 months, will be referred to in this commissioned research report. A set of rules handling conflicts of interest is implemented in the Carnegie Group. Investment Banking and other business departments in Carnegie are surrounded by information barriers to restrict the flows of sensitive information. Persons outside such barriers may gain access to sensitive information only after having observed applicable procedures. The remuneration of persons involved in preparing this commissioned research report is not tied to investment banking transactions performed by Carnegie or a legal person within the same group.

Confidential and non-public information regarding Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner.

Internal guidelines are implemented in order to ensure the integrity and independence of research analysts. In accordance with the guidelines the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues; contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines and analyst remuneration.

Other material conflicts of interest

This report was commissioned and sponsored by the issuer (issuer-paid research).

Distribution restrictions

This commissioned research report is intended only for distribution to professional investors. Such investors are expected to make their own investment decisions without undue reliance on this commissioned research report does not have regard to the specific investment objectives, financial situation or particular needs of any specific person who may receive it. Investors should seek financial advice regarding the appropriateness of investing in any securities discussed in this commissioned research report and should understand that statements regarding future prospects may not be realized. Past performance is not necessarily a guide to future performance. Carnegie and its subsidiaries accept no liability whatsoever for any direct or consequential loss, including, without limitation, any loss of profits arising from the use of this commissioned research report or its contents. This commissioned research report may not be reproduced, distributed or published by any recipient for any purpose. The document may not be distributed to persons that are citizens of or domiciled in any country in which such distribution is prohibited according to applicable laws or other regulations.

This commissioned research report is distributed in Sweden by Carnegie Investment Bank AB. Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability which is authorised and regulated by the Swedish Financial Supervisory Authority (Finansinspektionen). In Finland this commissioned research report is issued by Carnegie Investment Bank AB, Finland Branch. The Finland branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Finnish Financial Supervisory Authority (Finansivalvonta). In Norway this commissioned research report is issued by Carnegie AS, a wholly-owned subsidiary of Carnegie Investment Bank AB. Carnegie AS is regulated by the Financial Supervisory Authority of Norway (Finanstilsynet). In Denmark this commissioned research report is issued by Carnegie Investment Bank AB, Denmark Branch.
